Great. Sipaulovi agreed to include cost as determined in 2014 PER.

Working optimistically ahead on others.

We can definitely discuss phasing. However I do want to spend some time on the Village agreements because I think that is going to be key to getting any funding (phased or not). Thanks Tim.

Where: Phone call - see call in #

I will reserve the call appointment and concede 10 minutes of my time to discuss potential project phasing if you think it's timely or appropriate?

A closer look at conceptual phasing construction costs indicate we may be able to build a mainline spur from TT#2 to Second Mesa Community Center for approximately \$5 Million if FY 2018 funds are available?

An additional spur directly from Second Mesa to First Mesa connecting all villages may be added for an additional cost of approximately \$5 Million.

Final interconnect of wells and storage may be an additional \$2 Million POP (Preliminary Opinion of Probable) construction costs for

planning purposes.

James Carter + IHS Lakeside are looking into this more.

Good team approach happening here at Hopi.....
